

Battery cabinet placement site in distribution room

Overview

How should a battery room be located?

This will reduce the cost and exposure of the dc distribution system. The battery room shall be located in a way that provides access for lifting equipment to be used during initial installation and future maintenance operations. The location shall be as free from vibration as practical.

Where should storage batteries be located?

Storage batteries shall be located within a protective enclosure or area accessible only to qualified persons. A protective enclosure can be a battery room, control building, or a case, cage, or fence that will protect the contained equipment and limit the likelihood of inadvertent contact with energized parts.

Where should batteries be installed in a substation?

Batteries installed in unit substations, electrical equipment rooms and instrument rack rooms shall comply with the requirements of this section, Main Substation Design and Unit Substation Design. In these locations, stainless steel hoods vented to the outside shall be installed over batteries.

Does a battery room cover maintenance free or computer room type batteries?

It does not cover maintenance free or computer room type batteries and battery cabinets. Main keywords for this article are Battery Room Design Requirements, vented lead acid batteries, battery room safety requirements, Battery Room Ventilation, unit substations electrical. Batteries can be hazardous to both personnel and equipment.

What are the safety requirements related to batteries & Battery rooms?

Employers must consider exposure to these hazards when developing safe work practices and selecting personal protective equipment (PPE). That is where Article 320, Safety Requirements Related to Batteries and Battery

Rooms comes in.

Where should a battery charging facility be located?

Facilities for quick drenching of the eyes and body shall be provided within 25 feet (7.62 m) of battery handling areas. Facilities shall be provided for flushing and neutralizing spilled electrolyte and for fire protection. Battery charging installations shall be located in areas designated for that purpose.
