Our mission at BONUS Solar is to provide environmentally friendly energy-saving solutions to homes and businesses of all sizes. We are a leading distributor of quality branded renewables specialising in solar PV and energy storage solutions for all residential and commercial needs.

Do solar panels qualify for the IRA bonus credit?

The domestic content bonus credit within the IRA provides an additional bonus credit to solar energy installers that use American-made solar panels, specifically those with cells made in the United States.

Do solar panels qualify for bonus depreciation?

To qualify for bonus depreciation, a solar energy system must be used for business or income-producing activities, as personal use systems are not eligible. This includes solar panels, inverters, racking, and energy storage devices like batteries if charged by the solar array.

Which cadmium-telluride thin-film solar panels qualify for the domestic content bonus?

First Solar's cadmium-telluride thin-film solar panels, which are made in Ohio using a unique vapor deposition process that technically qualifies as cell manufacturing, are the only ones that meet the requirement for the domestic content bonus as-written.

How do I Claim Bonus depreciation for a solar asset?

The remaining basis of \$255,000 is then depreciated over the standard five-year MACRS schedule. To claim bonus depreciation for a solar asset, a

business must file IRS Form 4562, Depreciation and Amortization, with its federal income tax return. The special depreciation allowance is reported in Part II of this form.

How much can a business deduct from a solar system?

For solar systems installed between 2017-2022, businesses could deduct 100% of the system cost in year one. Starting in 2023, the allowed first-year deduction decreases by 20% each year: – 2023: 80% deduction – 2024: 60% deduction – 2025: 40% deduction – 2026: 20% deduction – 2027 onwards: 0% (bonus depreciation phases out)
