

**SolarMax Pro Energy Storage Systems**

# **Central Asia Independent Energy Storage Project**

## Overview

---

Co-developed by ACWA Power and Uzbekistan's Ministry of Energy under an Independent Power Producer (IPP) framework, the Project features a 334MW/500MWh single-stage distributed storage system comprising 280 BESS containers. Can energy storage solve transboundary water and energy conflict in Central Asia?

A solution for transboundary water and energy conflict in Central Asia is proposed. Benefits of energy storage beyond the energy sector are shown. Long duration energy storage is key for high shares of solar PV and wind energy in the region. An open-access, integrated water and energy system model of Central Asia is developed.

Does Central Asia have an integrated water and energy system?

An open-access, integrated water and energy system model of Central Asia is developed. Central Asia's energy transition to a high share of renewable energy by 2050 is analyzed. Model for Energy Supply Systems Alternatives and their General Environmental Impact 1. Introduction.

Is water use a problem in Central Asia?

Introduction Water use for irrigation and electricity generation has long been subject to dispute between downstream and upstream countries in Central Asia .

## Central Asia Independent Energy Storage Project
