China Communications 5G network base station operation

Overview

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference.

How many base stations does China have?

China made the rollout of 5G networks a vital component of its push to boost economic growth and now boasts nearly three million base stations, according to government data. As with any wireless technology, the number of base stations determines the coverage and capacity.

Will 5G boost China's economic growth?

Qualcomm, a primary provider of technology for mobile networks, estimates that 5G can potentially enable over US\$13 trillion of economic output and create over 22 million jobs. China made the rollout of 5G networks a vital component of its push to boost economic growth and now boasts nearly three million base stations, according to government data.

Who are China's 5G operators?

Chinese main operators are China Mobile, China Telecom and China Unicom. In addition to its expected expansion in the 5G field, China noted that it is also set to begin trials for 10-gigabit optical networks and enhance computing power infrastructure, reflecting the growing demand for artificial intelligence (AI) technologies.

Will 5G Revolution & 6G innovation be a priority next year?

The move comes as the country charted its vision for industrial growth during a two-day work conference of the Ministry of Industry and Information Technology. With 4.19 million 5G base stations already in operation, the

industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.

How many 5G subscribers does China Mobile have?

China Mobile has added a total of 166.22 million subscribers in the 5G segment since the beginning of the year. Rival operator China Unicom said it added a total of 7.88 million 5G subscribers during last month. During the first nine months of the year, the carrier added a total of 66.11 million 5G subscribers.
