## **Construction cost of energy storage power station**

## Overview

---

What is energy storage cost?

Energy storage cost is an important parameter that determines the application of energy storage technologies and the scale of industrial development. The full life cycle cost of an energy storage power station can be divided into installation cost and operating cost.

Why is energy storage cost important?

One of the key considerations when it comes to energy storage is cost. Energy storage cost plays a significant role in determining the viability and widespread adoption of renewable energy technologies. The cost of energy storage is a crucial aspect to consider when evaluating the feasibility and scalability of renewable energy systems.

How much does a compressed air energy storage system cost?

The current cost of compressed air energy storage systems is between US\$500-1,000/kWh. Supercapacitor energy storage cost: Supercapacitor is a high-power density energy storage device, and its cost is mainly composed of hardware costs, including equipment such as capacitors and control systems.

How will a pumped storage power plant contribute to the energy transition?

The company is making a significant contribution to the energy transition and is continuing its corporate transformation towards more renewable energy generation. By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany.

What are the future trends in energy storage costs?

Furthermore, the document discusses future trends in energy storage costs, such as the development of higher capacity cells, cost reductions driven by raw material prices and production capacity, and advancements in system prices and technological progress. Energy storage has become an increasingly

important topic in the field of renewable energy.

Why should we invest in a pumped storage power plant?

By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany. This investment is part of our previously announced strategy to invest in growth and transformation towards a greener business.
