

**SolarMax Pro Energy Storage Systems**

# **Energy storage power station approval**

## Overview

---

How will a pumped storage power plant contribute to the energy transition?

The company is making a significant contribution to the energy transition and is continuing its corporate transformation towards more renewable energy generation. By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany.

Why should we invest in a pumped storage power plant?

By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany. This investment is part of our previously announced strategy to invest in growth and transformation towards a greener business.

What is a battery energy storage system?

Battery energy storage systems (BESS) stabilize the electrical grid, ensuring a steady flow of power to homes and businesses regardless of fluctuations from varied energy sources or other disruptions. However, fires at some BESS installations have caused concern in communities considering BESS as a method to support their grids.

What happened at Gateway energy storage facility?

On May 15, 2024, Gateway Energy Storage Facility in San Diego, California, experienced a BESS fire with continued flare-ups for seven days following the fire. The facility held about 15,000 nickel manganese cobalt lithium-ion batteries.

Why should you choose Landshut power stations?

Our plants and power stations provide a wide range of additional benefits, from flood protection to grid stability and water purification. A central control room at the company's German hydropower headquarters in Landshut ensures that the power stations work together to meet demand.

Why is Germany's largest hydropower operator a reliable power supply?

As Germany's largest hydropower operator, we are thus contributing to a reliable power supply in the south and demonstrating our commitment to the energy transition. The 160-megawatt (MW) power plant has a drop height of 209 meters and can store approximately 850 megawatt-hours (MWh) of electricity in the form of pumped water.

## Energy storage power station approval

---

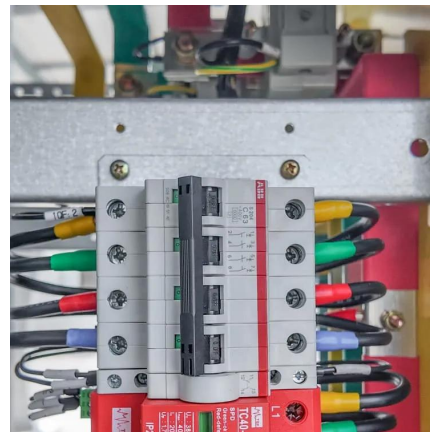

### Appendix 1

Jurassic Solar GP Ltd., pursuant to Approval 28534-D02-2023,1 has approval to construct and operate a solar power plant and battery energy storage system (BESS) designated as the ...

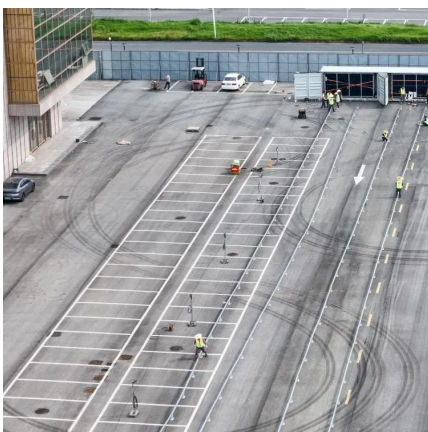

### [New York approves 135MW BESS at fossil fuel plant site](#)

Approval has been granted for construction of a large-scale battery energy storage system (BESS) at the site of an existing fossil fuel power plant ...

### [Energy storage power station approval list query](#)

What pumped storage power stations ushered in a new peak? During the "Twelfth Five-Year Plan" and "Thirteenth Five-Year Plan" periods, to adapt to the rapid development of new ...
