How much does a 360-watt solar panel cost

Overview

The cost of a 360 solar panel generally ranges from \$1,000 to \$1,500, depending on several factors, including brand, quality, and regional pricing variations. Numerous aspects can impact these expenses, such as installation fees, local incentives, and maintenance over time. How to choose a 360 watt solar panel?

When choosing a 360 watt solar panel, price is decided by the manufacturer. If you are looking for the most efficient modules and don't want to pay too much, many Chinese manufacturers can offer you excellent price to efficiency ratios. On the other hand, if quality goes before everything else, there are many European, Japanese and Korean brands that prioritize quality.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.
