

# **How much does it cost to install BESS photovoltaic panels on the roof**

## Overview

---

The average cost is expected to fall between \$24,000 and \$36,000. This range can vary depending on your location, the size of your system, and the specific installer you choose, so it's smart to request a personalized quote to get the most accurate estimate. How much would a rooftop solar system cost without Bess?

Without BESS, the same household could install 10 kW of rooftop solar, which would cost \$28,700 and save \$1,567 per year. PGE and the state of Oregon both offer incentives for rooftop solar and battery energy storage. With the utility, state, and federal incentives, the combined solar and BESS system could be paid back within 11 years.

How much does a rooftop solar system cost in Oregon?

In Oregon, a 7.5 kW rooftop solar system plus a 13.5 kWh BESS would cost \$43,125 on average to install without incentives. The state's largest utility, Portland General Electric (PGE), offers a TOU rate option, and Oregon also has a net metering policy, paying the same utility rate for excess solar production.

How much does solar installation cost?

On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system. What else affects solar installation costs?

.

How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. 1,2,12 This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would

cost between \$21,900 – \$26,400.

How much would a solar system cost without Bess?

Without BESS, the same household could install 10 kW of rooftop solar, which would cost \$29,200 and save \$1,357 per year. Without financial incentives, the payback period for the rooftop solar and BESS would be around 28 years, but with the Investment Tax Credit it's brought down to 20 years.

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.
