How much is the Gambia 5G base station

Overview

How much does a 5G base station cost?

[Click Here To Download It For Free!](#) Setting up a 5G base station is expensive, with costs ranging from \$100,000 to \$200,000 per site. This price includes hardware, installation, site rental, and maintenance. Urban areas often have higher costs due to land prices and infrastructure challenges.

How much does a SIM card cost in the Gambia?

SIM cards are genuinely available at no cost in the Gambia – no minimum top-up required. The cost of mobile data, however, is on the high-end for African standards. The same on a global level, but it is still average. In this guide, I will tell you everything you need to know about buying a SIM card in the Gambia. Let's do this.

How fast is 4G in Gambia?

But Africell Gambia has reported 4G/LTE download speeds between 40 Mbps and 80 Mbps. Unless you are from the United Arab Emirates or South Korea, where the average mobile download speeds is more than 200 Mbps, these speeds are quite impressive – especially for regional standards. But remember – these are the best results possible.

How much does mobile data cost in the Gambia?

On the more expensive side, for regional standards, but still average. The average price for 1 GB of data in the Gambia is 5.86 USD, around the African average of 5.80 USD. The world average is 4.07 USD. The country is in the top 10 African countries with the highest average mobile data costs. But you will see things can be much worse.

Which SIM card is best in Gambia?

If you want to buy the best SIM card in the Gambia, I recommend going with Africell. It has the best coverage and the fastest speeds. However, its network

can be overloaded during peak hours, resulting in slow connections. Unfortunately, none of the mobile operators offer eSIM (to prepaid customers) in Gambia yet.

How many mobile operators are there in Gambia?

The Gambia is actually home to four mobile operators, even though I will only be covering two of them (Africell Gambia & QCell Gambia). That is because both Comium and Gamcel have embarrassing coverage (only in the Banjul area, basically) and even more shameful mobile data speeds.
