

SolarMax Pro Energy Storage Systems

How to replace the base station power supply

Overview

How do you replace a power supply?

To replace the power supply in a Lenovo ThinkCentre E73, slide it toward the inside of the system, tilt it, and pull it out. Replace it with the new power supply. Place the new power supply in the system, tilt it, and slide it toward the rear. Install the four screws in the back of the power supply. Connect the fourteen pin power cable to the system board.

How do I install a new power supply unit?

Assuming you have the new power supply unit ready for installation, follow the steps highlighted below to get it up and running: Start by inserting the PSU into the exact position of the old unit. You may have to take out the PSU shroud or the enclosure and drop the PSU in it if your PC case comes with one.

Do I need to replace my power supply if I upgrade?

Sometimes when you upgrade your PC, you will find that current power supply isn't powerful enough to support your new system. If you need to replace your power supply, here is how. Unscrew and remove the side panel of your tower and locate the power supply.

Do you have a warranty claim on a base station power cord?

Six months ago we put in a Warranty Claim on a base station power cable that went bad. For a \$1000 VR headset, you'd think that a simple, inexpensive warranty claim for a power cord would be the easiest customer service win on the planet. Decided to just order the power adapter and extension cable from Amazon. Thanks Valve. So I'm not the only one.

How do I replace my old PSU?

Plug everything back into the motherboard IO, flip the PSU power switch on, and see if everything works properly before securing the side panels back in

place. And that's how easy it is to change your old PSU with a new one.

How do I fix a dead power supply?

Connect the PSU to your main fan (the biggest one) and as many other ones as your connection supports. Put your computer's side back on, fasten the screws and try out your new power supply. Can the power supply be fixed if it is dead?

How to replace the base station power supply
