

# **Huawei wins the largest energy storage project**

## Overview

---

At the summit, Huawei Digital Power signed a key contract with SEPCOIII for the Red Sea Project with 400 MW PV plus 1300 MWh battery energy storage solution (BESS), which is currently the world's largest energy storage project. What makes Huawei a great energy storage company?

Huawei has more than 10 years of experience developing and researching energy storage systems, and this has been applied throughout a global installed base of more than 8 GWh.

What is Huawei's Red Sea energy storage project?

This project also represents the largest energy storage project since Huawei officially launched the Smart String Energy Storage Solution for utility-scale PV power plants in June 2021. Sitting on the Saudi Arabian Red Sea coast, the Red Sea project is one of the key projects as part of the Saudi Vision 2030.

Is Huawei a reliable partner?

Huawei is a reliable partner for customers all over the world, providing long-term and efficient support in terms of delivery and service. According to the contract, Huawei's FusionSolar Smart PV + Storage solution will be delivered from June 2022, and the whole project is expected to be completed on March 2023.

How does Huawei manage lithium batteries?

Simplified O&M: Huawei uses power electronic technologies to overcome the inconsistencies inherent to lithium batteries, and implements refined management to maximize the battery charge and discharge capacity, while also supporting mixed use of old and new batteries and facilitating maintenance and replacement.
