

### **Korea container substation**

#### **Overview**

How much transmission capacity does South Korea have in 2022?

South Korea had 354,976MVA of capacity in 2022 and this is expected to rise to 395,510MVA by 2028. Listed below are the five largest transmission projects by capacity in South Korea, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a complete picture of the global transmission segment.

What is a containerized mobile substation?

Containerized mobile substations are sheltered and address applications in challenging environmental conditions including areas with high pollution, high humidity, extreme temperatures or sand storms. Containers are easy to transport and fast to install, by reducing foundation works as well as installation and commissioning effort on site.

What is the scope of supply for containerized Mobile substations?

The scope of supply covers the complete assembly which may include: Containerized mobile substations are sheltered and address applications in challenging environmental conditions including areas of high pollution, and humidity.
