

**SolarMax Pro Energy Storage Systems**

## **Latvia Telecom site energy battery cabinet parameters**

## Overview

---

Where is the first battery energy storage system in Latvia?

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in Targale, Ventspils region.

Are new wind farms a good investment for Latvia's energy security?

I am pleased that the bar has been set high for developers of new wind farms, which also plays an important role in the context of Latvia's energy security," said Climate and Energy Minister of Latvia, Kaspars Melnis. Given the total investment in the project, the OP Corporate Bank provided loan financing.

How do I choose a battery for my Telecom site?

Environment: Consider the environmental conditions at your telecom site. Extreme temperatures, humidity, and other factors can influence the battery system's performance. Ensure the chosen battery can withstand the local climate.

Are battery technologies a good choice for a telecom site?

The telecom industry is continually evolving, and so are battery technologies. Here are some emerging technologies that may impact your decision:  
Advanced Lithium-ion Batteries: New developments in lithium-ion batteries offer increased energy density and longer lifespan, making them a compelling choice for telecom sites.
