

**SolarMax Pro Energy Storage Systems**

# **Moldova All-Vanadium Liquid Flow Energy Storage Power Station**

## Overview

---

What is Dalian flow battery energy storage peak shaving power station?

The power station is the first phase of the "200MW/800MWh Dalian Flow Battery Energy Storage Peak Shaving Power Station National Demonstration Project". It is the first 100MW large-scale electrochemical energy storage national demonstration project approved by the National Energy Administration.

What is the Dalian battery energy storage project?

It adopts the all-vanadium liquid flow battery energy storage technology independently developed by the Dalian Institute of Chemical Physics. The project is expected to complete the grid-connected commissioning in June this year.

How many kWh will a power station store?

The project is expected to complete the grid-connected commissioning in June this year. After the completion of the power station, the output power will reach 100 megawatts, and the energy storage capacity will reach 400 MWh, which is equivalent to storing 400,000 kWh of electricity.
