

Netherlands PV Energy Storage Subsidy

Overview

Netherlands' climate minister has allocated €100 million in subsidies to the deployment of 'time-shifting' battery storage with solar PV projects for next year, an acceleration of a larger €400 million-plus programme. How much money does the Netherlands spend on battery energy storage?

Netherlands' climate minister has allocated €100 million in subsidies to the deployment of battery energy storage system (BESS) technology.

Will the Netherlands support battery storage in solar PV projects?

Netherlands recently announced €100 million in subsidies for the development and integration of battery storage in solar PV projects covering about 160-330 MW for 2025, in response to emerging challenges related to grid constraints and renewable integration in the country.

Why did the Dutch government grant €100 million to solar PV projects?

Image for representation purposes only. The Dutch government recently announced €100 million in subsidies for the development and integration of battery storage in solar PV projects covering about 160-330 MW for 2025, in response to emerging challenges related to grid constraints and renewable integration in the country.

When will a new battery storage scheme open in the Netherlands?

The scheme is scheduled to open on Jan. 1, 2025, and end in 2034. The funding is part of a €416 million subsidy program that was announced last year. The Dutch government said it would allocate the funds from the climate package issued in 2022, with the subsidies to facilitate the deployment of 160 MW to 330 MW of battery storage.

How many watts of PV does the Netherlands have in 2022?

As of June 2022, the country had a cumulative installed PV capacity of 16.5 GW, with 3,803 MW added in 2021 and 3,882 MW deployed in 2022, according

to the nation's statistics agency, CBS. In February 2024, after a year of discussions and negotiations, the Dutch parliament decided to maintain the country's net-metering scheme.

What is the €100 million Bess scheme?

The €100 million (US\$106 million) allocation is part of a €416 million package for PV co-located battery energy storage system (BESS) technology that was initially to total €41.6 million a year, starting in 2025, for ten years. The 2025 programme is set to open on 1 January 2025, and more details will be released to the House later this year.
