

SolarMax Pro Energy Storage Systems

North Macedonia energy storage project electricity price subsidy

Overview

The €80 million comes as subsidies for household electricity bills, support for small and medium-sized companies to maintain business continuity, as well as state investments for energy transition, renewable energy sources and energy efficiency. Will North Macedonia become self-sufficient in electricity production?

The vision of the new ministry is for North Macedonia to become self-sufficient in electricity production. According to Božinovska, it is crucial for the country to focus on domestic electricity generation, as it currently lacks new renewable energy capacities.

Why did the new government of North Macedonia need securing energy supplies?

Firstly, the Ministry of Energy, Mining, and Mineral Resources needed to address a critical issue: securing energy supplies for the winter. Sanja Božinovska stated that the new Government of North Macedonia inherited a challenging situation in the energy sector and had to make every effort to ensure a reliable energy supply throughout the winter.

How does Macedonia affect energy prices?

As previously mentioned, Macedonia has a very small impact on the energy prices at regional level. On the other hand, the development of energy markets in Europe, especially in the field of electricity, has been taken into account in the development of the Energy Strategy of Macedonia.

What is the gross available energy in Macedonia?

The gross available energy represents the quantity of energy products necessary to meet all the demand of entities in Macedonia. According to this indicator, among the WB6, Macedonia is ahead of Serbia and Kosovo*, but is over 2.5 times lower than the average of the EU 28 (Figure 21).

Does Macedonia have a gasification plan?

Additionally, Macedonia has an ambitious gasification plan and a detailed list of planned infrastructure project of the gas network in Macedonia with timeline is given in Chapter 4, Energy transmission infrastructure.

How much money does North Macedonia spend on R&D?

According to Eurostat, the intramural R&D expenditures (GERD)⁴² in North Macedonia in 2018 are estimated to 39.07 Mil. EUR and most of it are realized in the higher education sector (58%) and business enterprise sector (30.6%), while the rest are in the government sector (9.8%) and private non-profit sector (1.6%).
