How much power do you need for an outbuilding?

If the outbuilding isn't more than 50 ft. from the house and has a few lights and outlets, it usually can be supplied by a 120v, 20-amp circuit and 12/2 w/grd UF cable. But check with local building authorities before you start. Get the necessary permit, code requirements, and inspection schedules.

Can a portable generator supply power during a power outage?

In cases where a standby generator is not practical or can't be installed for some reason, a portable generator can supply power during an outage. Most people probably grab a few handy extension cords and run them between the generator and the appliances inside the house.

Is a permanent power outlet necessary?

For lighting, lawn tools used on a regular basis, or power needs for outbuildings, you need a permanent power solution for safety. This can involve an outdoor outlet addition to your home's main structure, or wiring run

remotely to an outbuilding.

How do you extend a power receptacle outside?

The quickest way to extend power outdoors is to install a receptacle back-to-back with one inside the house.
