What is an integrated pole solar street light?

An integrated pole solar street light can be customized to meet your exact requirements. Thanks to the modularity of these solar LED street light units, you can optimize every aspect of lighting. From illumination to pole height to the number of PV cells to battery voltage to lighting control, you can get everything personalized.

What is a commercial solar light pole?

Solar Light poles and posts are an essential part of lighting infrastructure. Our commercial solar light pole systems provide an immediate solution for street lights, highway lights, parking lot lights , trail pathway lights, and more.

What is a pole-mounted solar power system?

Pole-mounted solar power systems feature an array of solar panels that are mounted on the top of or on the side of a pole that is set in the ground using a sufficiently-engineered concrete footing.

What is the most advanced solar lighting pole?

Years of development and innovation have led to the most advanced solar lighting pole in the market. Light-years ahead in solar technology, Hapco's Solar Lighting Pole is completely off-grid and works autonomously, using sustainable solar power.

What is a pole-mounted solar power kit?

Additional options include solar panel upgrade, batteries, and battery enclosures. These pole-mounted solar power kits are the perfect solution to your remote power needs for applications such as scientific, government, and military remote sensing, telecom, traffic signalling and control, and oil and gas flow monitoring and telemetry.

What is a Sol-Pol integrated solar LED street light?

A Sol-Pol integrated solar LED street light is a complete plug-and-play system. And this makes it really simple to install one of these lights. After the pole is mounted, you can turn the system on by simply plugging the connectors in.
