Russia s energy storage projects in 2025

Overview

When will Russia's energy strategy be approved?

On April 12, 2025, Mikhail Mishustin, Prime Minister of the Government of the Russian Federation signed an order approving the Energy Strategy of the Russian Federation until 2050.

How long will Russia's energy strategy last?

The government has approved a new version of Russia's Energy Strategy until 2050. Its renewal lasted more than three years. The document assumes various scenarios for the development of the industry. At the same time, there are a lot of "wishlist" in it.

What is Russia's energy strategy?

The strategy's priority objectives embrace guaranteed access of the Russian population and economy to the fuel and energy products and services, efficient unleashing of the country's export potential, and ensuring its energy security, technological sovereignty and competitiveness.

How big will Russia's power plant capacity be in 5 years?

At the same time, the capacity of power plants in Russia will grow from 253.5 GW to 287 GW in five years, and in 25 years to 331.2 GW. Gordey Smirnov, an analyst at Finam, notes that predicting energy consumption for decades to come is not an easy task.

What will Russia do in 2023 & 2050?

At the same time, Europe is not mentioned. It is said that the share of Russian exports in international coal trade will grow from 14.5% in 2023 to 21-23% in 2036 and to 24-27% in 2050. At the same time, the capacity of power plants in Russia will grow from 253.5 GW to 287 GW in five years, and in 25 years to 331.2 GW.

Which wind farms are being developed in Russia?

The company is actively developing the implemented wind generation projects. The Kola Wind Farm is the largest wind farm in the world beyond the Arctic Circle, generating up to 750 million kWh per year. The Azov Wind Farm was the first wind farm in Russia to be registered as a climate project in the Russian Carbon Units Register.
