Set up base stations outdoors

Overview

How do I install a base station CB system?

Base Station CB systems are not complicated to install, but there are a few things you should know. So, let's get into it. First, you need a radio system that works off of AC power. Most CB radios are designed for vehicles that are powered by DC 12-volt power systems.

What is a base station & how does it work?

A base station is generally a radio system that is set up in a fixed location such as house or building. Since a fixed location allows one to install a much taller antenna than an antenna on a vehicle, you can get significantly more potential range. Remember, the longer the CB antenna, the more potential range that you will have.
