

**SolarMax Pro Energy Storage Systems**

# **Singapore s largest energy storage power supply manufacturer**

## Overview

---

Sembcorp Industries (Sembcorp) and the Energy Market Authority (EMA) today officially opened the Sembcorp Energy Storage System (ESS). The Sembcorp ESS is Southeast Asia's largest ESS and spans across two hectares of land in the Banyan and Sakra region on Jurong Island. What is Southeast Asia's largest energy storage system?

Sembcorp Industries (Sembcorp) and Singapore's Energy Market Authority (EMA) have officially opened what is being touted as Southeast Asia's largest energy storage system. The Sembcorp energy storage system (ESS) spans two hectares of land in the Banyan and Sakra region on Jurong Island, southwest of the main island of Singapore.

Does Singapore need energy storage systems?

The Energy Market Authority (EMA), a statutory board under the Singapore Ministry of Trade and Industry, is taking proactive steps to encourage the deployment of energy storage systems across the island. Various statutory papers have been published to provide clarity on the deployment of ESS in Singapore and the current regulatory framework.

Will a large-scale energy storage system complement Singapore's efforts to maximise solar adoption?

Energy Market Authority (EMA) chief executive Ngiam Shih Chun said that the large-scale energy storage system will complement Singapore's efforts to maximise solar adoption, by storing and delivering energy despite the intermittent nature of solar power.

What is Singapore's solar energy system (ESS)?

Built across two sites on Jurong Island, our ESS enhances Singapore's grid resilience by mitigating the impact of solar intermittency as the republic progresses towards achieving its 2030 solar target of at least 2GWp and energy storage systems deployment of 200MWh beyond 2025.

When will Singapore's energy storage system be completed?

EMA's director of industry development Jeanette Lim said that the energy storage system had to be completed by December last year in order to provide energy, reserves and regulation services to enhance Singapore's grid resilience, to manage any protracted market and energy supply volatility.

What is a battery energy storage system?

Battery energy storage systems (ESS) provide critical frequency and stability support to power grids. As one of Asia's largest battery operators, our energy storage portfolio is well-positioned to support the evolving needs of power markets as they increase their uptake of renewable energy. The Sembcorp Energy Storage System was launched in 2023.
