Small Base Station Communication Patents

SMALL BASE STATION FOR MOBILE COMMUNICATION SYSTEM

[0001] The present invention relates to a base station of a mobile communication system, and more particularly to a small base station installed in a building or a house.

US Patent Application for SMALL BASE STATION FOR MOBILE COMMUNICATION

The present invention relates to a base station of a mobile communication system, and more particularly to a small base station installed in a building or a house.

SMALL BASE STATION AND COMMUNICATION CONTROL METHOD THEREFOR

In recent years, small cells have drawn wide attention in the communications industry. A small cell is a small-sized low-power base station, and can provide, based on ...

US Patent for Small base station for mobile communication system Patent

The present invention relates to a base station of

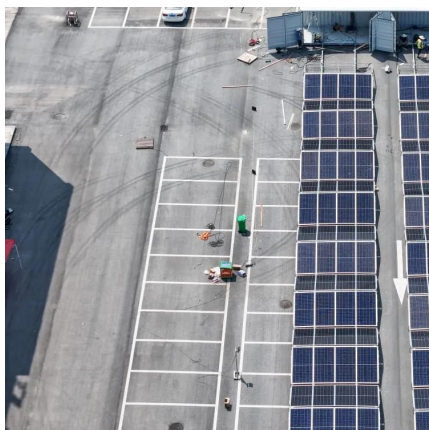

a mobile communication system, and more particularly to a small base station installed in a building or a house.

Methods And Devices For Wireless Communications

Patent Information Application # Patent Number
Invention Field COMMUNICATION Publication
Type INA Publication Number 12/2020 Status
Granted Grant Date ipo@iphorizons Filing ...

EP2983431B1

Patent application number US2013/0039285 by
S.Sorrentino and published on Feb.14, 2013,
develops a base station method that involves
assigning a terminal-specific base sequence and
...

US9668259B2

This small-scale base station is provided at
hotspots where many base stations performing
communication are present and in dead zones
where signals do not reach to improve the

JPWO2011055696A1

In this communication system, a small base station (hereinafter referred to as a "femtocell base station") having a very small cell (femtocell) with a radius of several meters to several

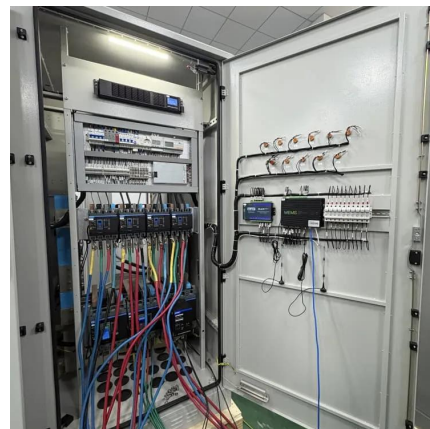

Communication control method, radio communication system, ...

Based on a reception result of the reference signals, a use antenna group pattern and at least one use antenna group that are to be used for transmission of a radio signal from the small base ...

Small cell base station integrated with

The base station may include baseband equipment, radios and antennas that are configured to provide two-way radio frequency ("RF") communications with mobile subscribers ...

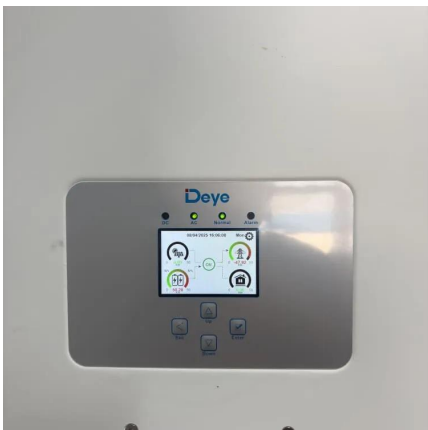

US Patent for Small-scale base station, communication system, ...

This small-scale base station is provided at hotspots where many base stations performing communication are present and in dead zones where signals do not reach to improve the ...

WO2014077634A1

A small-sized base station employed in a mobile communication system is disclosed. To this end, the small-sized base station in a mobile communication system, according to one embodiment ...

US Patent for Small base station for mobile communication ...

The present invention relates to a base station of a mobile communication system, and more particularly to a small base station installed in a building or a house.

Communication system and small cell base station

A deviation of time at which downlink signals synchronously transmitted from a macro-cell base station and a small-cell base station respectively reach a communication terminal apparatus ...

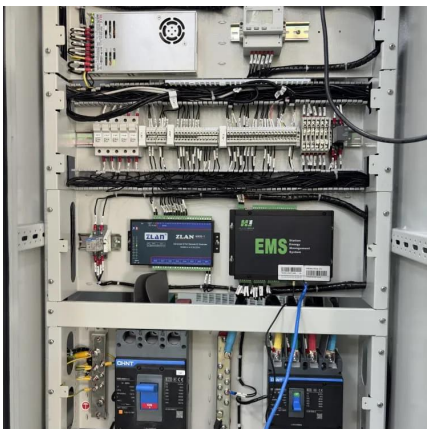

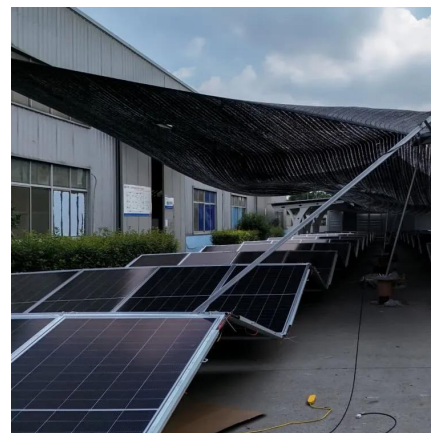

Communication control method, radio communication system, small base

Based on a reception result of the reference signals, a use antenna group pattern and at least one use antenna group that are to be used for transmission of a radio signal from the small base ...

EP2884676B1

the small base station employed in the existing mobile communication system is configured such that main components mounted to the interior of the base station, for example, a main board, a ...

US9491799B2

the small base station employed in the existing mobile communication system is configured such that main components mounted to the interior of the base station, for example, a main board, a ...

SMALL BASE STATION AND COMMUNICATION CONTROL ...

In recent years, small cells have drawn wide attention in the communications industry. A small cell is a small-sized low-power base station, and can provide, based on ...

US20150156818A1

The present invention discloses a base station, the size of which is reduced and which is to be adopted in a mobile communication system. The disclosed small base station includes: a ...

US9668259B2

A small-scale base station includes a digital signal processor configured to generate subframes of a given number, based on first information unique to the small-scale base station and by ...
