

**SolarMax Pro Energy Storage Systems**

# **Solar power home market**

## Overview

---

The Home Solar System Market is projected to grow from USD 67207 million in 2024 to an estimated USD 245851.62 million by 2032, with a compound annual growth rate (CAGR) of 17.6% from 2024 to 2032. Several factors are fueling the growth of the Home Solar System Market. What is the global residential solar PV market?

The global residential solar PV market was valued at USD 94.2 billion in 2024 and is estimated to grow at a CAGR of 7.9% from 2025 to 2034. A residential solar photovoltaic (PV) system is a setup that uses solar panels to capture sunlight and convert it into electricity for a home.

How has the residential solar market changed in 2024?

Declines in residential solar markets have been a hit to the industry—but its foundation is strong. Worldwide, 2024 was a difficult year for the residential solar market. After several years of 30 percent annual growth in installations, 2024 saw a decline: fewer panels were installed in many markets, and companies' valuations declined.

Is the residential solar market down?

The residential solar market is down, not out. Our analysis indicates that the market is likely to revert to more stable long-term growth over the next several years on the back of strong fundamentals. Almost certainly, surprises will pop up along the way; the industry is not called the solar coaster for nothing.

How much is the solar PV market worth in 2024?

To ensure that you don't miss their response, kindly remember to check your spam folder as well! The global residential solar PV market was valued at USD 94.2 billion in 2024 and is estimated to grow at a CAGR of 7.9% from 2025 to 2034.

Is the solar industry sustainable?

Even with the tremendous growth journey the industry has been on over the past decade (see sidebar, “The solar boom”), what we observed between 2020 and 2023 was simply not sustainable. A confluence of factors led the market worldwide to its new heights, with growth rates of 30 percent per year (Exhibit 1).

How much solar power does the United States have?

United States. As of this writing, nearly 40 gigawatts of residential solar capacity have been installed in the United States. This is almost half of US nuclear capacity and roughly 20 percent of total coal capacity.
