Sudan assembled outdoor power supply

Overview

Where will Sudan's first wind power plant be located?

Sudan has advanced a major step in developing its first wind power plant with the arrival of the wind turbine to be located in Dongola in the northern state, as part of the UNDP's wind energy project in the country.

What is the main source of electricity in Sudan?

Hydroelectricity is Sudan's largest source of on-grid power, accounting for 68% of generation in 2011, followed by diesel and heavy fuel oil (27%) and biomass and waste (5%). Hydroelectricity is generated from five dams at Roseires, Sinnar, Jebel Aulia, Khashm el-Girba, and Merowe.

How much electricity does Sudan use?

It is estimated that the total installed generation power capacity in Sudan in 2013 amounted to 2,533 MW, with about 70% of the electricity being consumed in the Khartoum area. Domestic power consumption dominates the market, with approximately 65% of electricity consumption being attributable to the sector.

What is power in Sudan?

Power in Sudan Sudan is a country with immense renewable energy potential, possessing a high hydropower potential based totally on its location on the river Nile and other watersheds, a high wind speed mainly in its northern and western region, and high solar radiation throughout the country.

Does Sudan have a problem with electricity supply?

Sudan is currently facing a major problem with electricity supply. According to the report "Tracking SDG 7: The Energy Progress Report (2021)", only 54% of the population in Sudan have access to electricity; this indicates more than 20 million people aren't connected to the national electricity grid.

Will Sudan face an energy problem in the future?

In December 2014, the United Nations Development Programme (UNDP) warned that Sudan could face an energy problem in the future, if it does not set up alternative power solutions, mainly because of the rapid growth in energy demand .
