# **Syria Base Station Energy Storage Power Supply**

## Overview

---

In addition to infrastructural damage, war also left Syria with acute shortages of the fuel and water needed to power Syria's thermal and hydroelectric infrastructure.

According to the in 2022 almost all electricity was generated from and , like . But according to as of.

As of 2025 the country lacks a stable grid. In August 2025, had been increased due to increased exports of Azerbaijani gas allowing for the reactivation of shut-down and.

Pre-2011In the 2000s, Syria's struggled to meet the growing demands presented by an increasingly energy-hungry society. Demand grew by roughly 7.5% per year during this decade, fueled by the expansion of.

Should the EU support energy generation in Syria?

In the short to medium term, it should support energy generation in Syria, especially in renewable electricity. In the longer term, it should offer Syria a role in an interconnected Eastern Mediterranean energy hub with independent access to the EU market for gas and electricity.

Should Syria become an energy hub?

In the longer term, it should offer Syria a role in an interconnected Eastern Mediterranean energy hub with independent access to the EU market for gas and electricity. For more than a decade, Syrians have been coping with severe energy shortages. Years of war and division have crippled over 50% of the country's electricity grid.

Why does Syria have a low electricity supply?

The war has seen a drop in electricity generation capacity from 8 500 Megawatts to just 3 500, primarily due to the destruction of key power plants including Mahardah, Aleppo and Zayzoun. The lack of reliable energy supplies is a major concern for Syrian citizens and its new government. Syria's oil and gas sector is in an even worse state.

What if Syria doesn't have reliable energy supplies?

The lack of reliable energy supplies is a major concern for Syrian citizens and its new government, making it a key point of leverage. Qatar and Türkiye have stepped in to provide short-term assistance. The two states have provided two floating power stations, while Türkiye is also connecting its grid to Syria.

Is Syria's energy system in ruins?

Syria's energy system is in ruins. To rebuild energy security the country's new government faces two major challenges. The first, vital for Syria's swift recovery and political stability, is bringing reliable flows of electricity and fuel to its people.

What is the outlook for Syria's Energy Resources & Infrastructure?

A quick outlook regarding Syria's energy resources and infrastructure, including the role of declining oil revenue under the Assad regime's governance and the prospects for, and geopolitical impact of, Syrian energy production and trade in a new era.
