Overview

Does Vatican City have solar power?

Yes. Vatican City has joined Albania, Bhutan, Nepal, Paraguay, Iceland, Ethiopia and the Democratic Republic of Congo to become one of just eight countries in the world to generate 100% of its electricity from renewable sources. Several church organizations around the world are making the move to solar.

Why did Pope Francis ask the Vatican to build a solar farm?

Pope Francis last year asked the Vatican to study developing the area into a vast solar farm, hoping to put into practice his preaching about the need to transition away from fossil fuels and find clean, carbon-neutral energy sources. Pope Leo XIV visited the site in June and affirmed that he intended to see Francis' vision through.

Why is Maasin Diocese installing solar panels?

The Maasin diocese was recognized as the first in the world to equip its churches with solar panels. By installing solar panels in our 42 parish churches, the diocese will try to avoid 191 metric tons of carbon dioxide emissions over the next 25 years through the generation of solar power.

Why did Pope Francis order an agrivoltaic plant in Santa Maria di Galeria?

Highlighting the need "to make a transition to a sustainable development model that reduces greenhouse gas emissions into the atmosphere, setting the goal of climate neutrality," Pope Francis has ordered the construction of an agrivoltaic plant within the extraterritorial zone of Santa Maria di Galeria.

Why did Pope Francis embrace solar power?

In Fratello Sole, Pope Francis roots the decision to embrace solar power in his own invitation "to all mankind," in the encyclical Laudato sí, to make lifestyle changes to counter global warming and the "pervasive" use of fossil fuels.
