

**SolarMax Pro Energy Storage Systems**

# **Vietnam outdoor wind power base station manufacturer**

## Overview

---

Who are the major wind power companies in Vietnam?

Major domestic wind power companies in Vietnam include Trung Nam Group, BIM Group, T&T Group, REE Corporation, and Gelex Group, all actively involved in developing wind farms across the country. Which foreign companies are involved in Vietnam's wind power industry?

.

Who makes wind turbines in Vietnam?

Siemens Gamesa, a major global wind turbine manufacturer and project developer, has a strong presence in Vietnam. The company supplies wind turbines for several onshore and offshore projects and provides maintenance and technical support.

What is the largest offshore wind project in Vietnam?

This is one of the largest offshore wind projects in Vietnam, being developed by Mainstream Renewable Power in collaboration with local partners. Located off the coast of Soc Trang province, the project has a planned capacity of up to 1,400 MW. It will be developed in multiple phases, with the first phase expected to provide 400 MW of capacity.

Who makes wind towers in Vietnam?

Enercon (Germany) is set to make market entry in their first project in 2016/17. Towers are available locally. As of July 2010 there have been three manufacturers of wind towers in Vietnam. CS Wind (South Korea) is currently the largest producer. Almost all its towers are exported.

Why is CS wind launching a new manufacturing facility in Vietnam?

With the ongoing high demand for towers, the rapidly growing offshore wind market in the APAC region, and the increasing need for transition pieces and

monopiles, CS Wind's new manufacturing establishment in Vietnam reflects this rising demand for steel components in the offshore wind sector.

Could Vietnam be a hub for wind energy technology in Southeast Asia?

As the country strives to meet its ambitious clean energy goals, a new industry is taking root: local wind turbine manufacturing. This development not only supports Vietnam's renewable energy targets but also positions the country as a potential hub for wind energy technology in Southeast Asia.
